National Network To End Domestic Violence (NNEDV) - State & U.S. Territories Coalitions

NNEDV represents the 56 state and U.S. territory coalitions against domestic violence. Domestic violence coalitions serve as state-wide and territory-wide leaders in the efforts to end domestic violence. These organizations connect local domestic violence service providers and are valuable resources for information about services, programs, legislation, and policies that support survivors of domestic violence.

Maryland Network Against Domestic Violence (MNADV) - Lethality Assessment Program (LAP)

The Lethality Assessment Program-Maryland Model (LAP), created by the MNADV, is an innovative, award-winning, nationally recognized practice to prevent intimate partner homicides and serious injuries. The LAP has also been identified as a "supported intervention" according to the Center for Disease Control's (CDC) Continuum of Evidence Effectiveness, and as a "leading promising practice" by the Office on Violence Against Women (OVW).

National Network To End Domestic Violence (NNEDV) Safety Net Project - <u>Confidentiality Toolkit</u>

This toolkit was created to assist victim service organizations and programs, co-located partnerships, coordinated community response teams, and innovative partnerships of victim service providers working to address domestic and dating violence, sexual assault, and stalking. This toolkit is meant to help providers and agencies understand and follow the confidentiality obligations mandated by the funding they receive through the Violence Against Women Act (VAWA), Family Violence Prevention and Services Act (FVPSA), Victims of Crime Act (VOCA), and related state and federal privacy laws.

Futures Without Violence- Explanations of Benefits & Safeguarding Sensitive Health Information

This memo looks at Explanation of Benefit (EOB) documents, explains the concerns about how they handle sensitive information, and explores possible solutions. It builds on important privacy and confidentiality conversations and explores where action and advocacy is needed to ensure that health insurance companies adhere to privacy principles.

International Centre for Missing & Exploited Children and Heal Trafficking- Documenting ICD Codes and Other Sensitive Information in Electronic Health Records

The following guidelines were developed by a subcommittee of stakeholders, including survivors of labor and sex trafficking, and were written to reflect a trauma-informed, rights-based approach (please see Resources at the end of this document for information on trauma-informed care). The guidelines aim to educate HCPs about how to work with trafficked/exploited/abused patients when making decisions about use of ICD codes and documentation of sensitive information in the electronic health record (EHR).
